

Magnetis **mm**

You don't have to take on multiple myeloma alone.

The MagnetisMM clinical research studies are committed to finding potential treatment options. See if participating in a study is right for you.

Introducing the MagnetisMM clinical research studies

We know it requires a community to take on multiple myeloma—and we're here to help by researching a potential treatment option.

The MagnetisMM clinical research studies will assess the safety and effectiveness of a study medicine called elranatamab in people with multiple myeloma.

Interested in taking part?

The MagnetisMM studies are welcoming people with multiple myeloma across a range of disease severities and treatment histories. We hope that with your help we can pursue progress against multiple myeloma.
