

Title: Vice President Clinical Research

Reports to: Chief Medical Officer

Department: Clinical Research

Location: Remote/Norwalk, CT

MMRF OVERVIEW

A pioneer in precision medicine, the Multiple Myeloma Research Foundation (MMRF) seeks to find a cure for all multiple myeloma patients by relentlessly pursuing innovations that accelerate the development of precision treatments for cancer. Founded in 1998 by Kathy Giusti, a multiple myeloma patient, and her twin sister Karen Andrews as a 501(c)(3) nonprofit organization, the MMRF has created the business model around cancer—from data to analytics to the clinic. The MMRF identifies barriers and then finds the solutions to overcome them, bringing in the best partners and aligning incentives in the industry to drive better outcomes for patients. Since its inception, the organization has collected thousands of samples and tissues, opened nearly 100 trials, helped bring 13 FDA-approved therapies to market, and built CoMMpass, the single largest genomic dataset for any cancer. Today, the MMRF is building on its legacy in genomics and is expanding into immune oncology, as the combination of these two fields will be critical to making precision medicine possible for all patients. The MMRF has raised nearly \$500 million and directs nearly 90% of the total funds to research and related programs. To learn more, visit www.themmr.org

The mission of the MMRF has always been to provide a cure for each and every patient. We know that multiple myeloma is different in every patient. Our goal is to generate and collect as much patient data as possible and make it available to researchers worldwide, to speed new discoveries and propel new clinical options for myeloma patients into the clinic as quickly as possible.

MMRF Core Values

At the MMRF our core values define both who we are and how we work together as an organization. We believe in investing in our team and building a culture that will help us pursue our highest level mission to accelerate a cure for each and every multiple myeloma patient. Our five core values are expressed below:

1. **Prioritize Patients** - Patients are at the center of everything we do. Every decision we make is grounded in the needs and best interests of the patients we serve.
2. **Drive Innovation** - We are committed to pursuing big, bold ideas. Taking risks, trying new approaches, and challenging the status quo are necessary to speed new discoveries.
3. **Deliver Solutions** - Taking on complicated challenges is what sets us apart. To deliver results, we must be decisive, take action, and act with urgency on behalf of the myeloma community.
4. **Do It Together** - We know that together, we are stronger. We work cross-functionally with the entire community to achieve our mission and are invested in the success of others.
5. **Build Trust** - We build trust-based relationships. We advocate for each and every myeloma patient by committing to diversity, equity, and inclusion and treating others with respect.

Position Overview:

Working under the direction of the Chief Medical Officer, and as part of the MMRF Leadership Team, the Vice President, Clinical Research will provide management and oversight for the Multiple Myeloma Research Consortium, LLC, a wholly owned subsidiary company of the MMRF. This role is

highly visible in the greater cancer research community – including some of the top researchers and clinicians, world class institutions, as well as those companies funding the research and commercialization of some of the most novel and impactful treatments on the market today. This position will have significant impact on the MMRF's goal of preventing or finding the cure to multiple myeloma.

Essential Functions:

- Work with the CMO to set the strategy for clinical research in the MMRF and MMRC and ensure that the clinical and basic research activities are complimentary and synergistic
- Oversee and effectively and efficiently manage the clinical strategy of the MMRC, inclusive of proportionate representation of patient populations to MMRF and MMRC clinical trials
- Set priorities and ensure efficient operations of clinical activities
- Regularly brief the Leadership Team on the effectiveness of the organizations' clinical advances and drug development strategies
- Collaborate with the marketing and development departments to ensure effective communication and awareness of clinical advances by the patients, industry, and donors
- Develop, maintain, and comply with the organizations' clinical and research policies and procedures; comply with all relevant regulations and laws; ensure accountability; and comply with codes of ethical principles and standards of professional conduct for medical executives
- Ensure timely and accurate fiscal operation of the clinical trial function
- Contribute to the success of the organization by ensuring resources are used to make the greatest contribution to the advancement of clinical care of patients with multiple myeloma
- Contribute to the clinical oversight of the MMRF CureCloud® program
- Provide guidance and oversight to the Director, Clinical Research and their team of Managers and Associates in the day-to-day operations of MMRC clinical trials
- Manage the MMRC by cultivating and maintaining strong positive relationships with MMRC member sites, investigators, CROs, pharma sponsors, and other stakeholders
- Manage the governance of the MMRC member sites, including organizing and running efficient and productive Project Review Committee meetings and Steering Committee meetings
- Work with Alliance Management and Research departments to identify new compounds to bring into the clinical trial pipeline

Qualifications:

- Bachelor's Degree (BA, BS) in scientific or health care discipline preferred
- Minimum of 10+ years of relevant experience; ideally a combination of pharmaceutical, biotech and/ or CRO-related oncology clinical research experience
- Oncology experience required; Hematology oncology therapeutic experience strongly preferred
- Excellent organizational skills, ability to multi-task and manage high performance demands and meticulous attention to detail
- Effective oral, written and interpersonal communication skills
- Computer literacy required (MS word, MS excel, MS PowerPoint and MS Project)
- CRO oversight experience
- Strong leadership and supervisory skills
- Ability to travel as necessary (approximately 20%)

EEO Statement

The Multiple Myeloma Research Foundation (MMRF) is an equal opportunity employer and does not discriminate against any candidate based on race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, military and veteran status, sexual orientation, or any other factor protected by federal, state, or local law.
